Bachelor of Applied Sciences- Management

Management is a dynamic profession in which an individual manager functions simultaneously as a planner, a supervisor, a leader, a decision maker and information officer, and advisor, a problem solver, and an evaluator of results. Managers perform a wide range of tasks and functions requiring a mix of technical, conceptual, and human skills. In businesses, it is of upmost importance to have an equal balance of customer and employee satisfaction. As a student completing the Bachelor of Applied Sciences in Management degree, you would learn those skills as well as many others necessary to run a business. If you have strong will and determination to run a successful business, then this program is for you.

Program Facts

What makes the program unique?

- Unique degree completion program that allows students with a technical associate degree to complete a bachelor's degree in 2 years
- Instructional format permitting students personal and extended contact with faculty and individualized guidance throughout all coursework.
- Provides marketable skills and knowledge, preparation for advancement on the job, and a strong foundation for graduate study.

What sets faculty apart from other colleges?

- The faculty is experienced practitioners in their field as well as experienced educators.
- Professors and Dean work closely with the student to give personal and individual advising guidance throughout their college career, later serving as a career reference.
- All courses are offered on campus and online with a hybrid option also available.

Facilities

- State-of-the-art, student designed computer lab
- Online and hybrid courses utilize BlackBoard learning platform
- A section specifically set aside for business literature and study aids in the recently renovated Library
