PROGRAM DEFINITION

The Computer and Management Information Systems (CMIS) option prepares students for employment in the development and use of computer-based systems that generate timely and accurate information used for managing an organization. Though a particular rigorous field of study, the financial rewards from completing a CMIS option can be particularly high, given the student acquires not only technical computer skills, but also a detailed understanding of the language processes, and issues of the business world. This program is completely available online as well as on campus.

PERU STATE'S POINTS OF DISTINCTION

- Faculty is experienced practitioners as well as experienced educators
- Evolving program that emphasizes network database and systems administration
- Practical experience through internship programs
- All courses are offered online and on campus
- Instructional format permitting students personal and extended contact with faculty and individualized guidance during throughout all coursework.
- Each program at Peru State College is reviewed on a continual basis and coursework is updated to meet industry standards.
- Students completing a degree at Peru State College are prepared to attend the nation's top graduate schools in all program areas.
- Adding an academic Minor in a subject area outside of the major is simple at Peru State and can broaden the scope of knowledge and can improve employment prospects for any student.

FACILITIES

State of the Art School of Professional Studies computer lab
