

My Blackboard

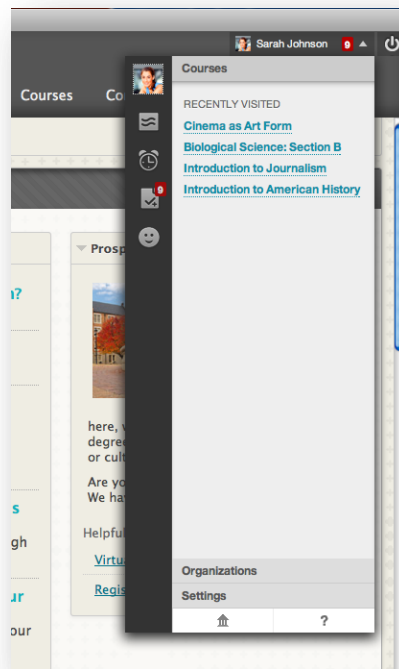

New Feature-Set for All Users

My Blackboard is about making the lives of students and educators easier. How? Through new tools that make up My Blackboard – Profile, Posts, Updates, and My Grades. We will discuss each tool in detail in this document. But first, let's discuss how you access My Blackboard.

New Global Navigation Menu

New Feature for All Users

The entry point to My Blackboard is a new Global Navigation Menu. This new menu is available all the time in the top right corner of the Learn interface and provides one-click access to your Courses, Settings, Blackboard Help, and the new My Blackboard tools. The numbers in red tell you if there's something that's new or needs your attention – so you never have to worry about missing anything. With this new Global Navigation menu, you can access everything you need quickly and easily, from wherever you are in the Blackboard Learn platform.

My Blackboard: Updates

New Feature for All Users

The Updates tool in My Blackboard consolidates all of your Notifications from across all your Courses and Organizations, so you never miss a thing. This tool updates you on course announcements, when new content or assignments are added to a course, when an assignment or assessment is due, and much more. And educators can also see when assignments and assessments need grading. To make it easy to manage this information, there are filters so you can look at all Notifications at once, only those from one particular Course or Organization, or just all Course Announcements. You can also change your notification preferences and pick exactly what you want to show up in this tool. With these helpful features, you can ensure you're always up-to-date on important updates from across Blackboard Learn.
